Medical Profession is a Science, an Art, combined with Humanity and extends from Womb to Tomb. It is dynamic and there is no end of learning for a Doctor. This is in essence the concept of C.M.E. Tremendous advances have been taking place in the field of Modern Scientific Medicine, continuously changing the concept and approach to Diagnosis, Prevention and management. New Diseases and Disorders are posing a challenge to the Profession. Public awareness, expectations and Consumer rights leading to litigation is on the rise and Doctor - Patient relationship is strained.

The rapid pace of these advances makes it Mandatory for Doctors to keep themselves updated so that they may apply this information to their Patient's well being and improve the quality of care rendered to them. A Doctor should never be satisfied with his/her current level of Proficiency and must always strive to enhance his/her competence and knowledge by keeping abreast with the latest developments.
